PeerGrid

Work Division Report

1. Adhwaydh K M

Sl. No.	Task
1	Developed the machine learning model for the PeerGrid application (college recommendation and ranking).
2	Collected, preprocessed and analyzed the dataset.
3	Trained, tested and optimized the model.
4	Integrated the ML model with the application.

2. Lithu P L

Sl. No.	Task
1	Designed the UI/UX of the PeerGrid application.
2	Developed the frontend and user interface screens.
3	Designed the logo, branding and visual assets.
4	Ensure responsive and user-friendly design.
5	Assist in documentation and presentation.

3. Amal Ghosh

Sl. No.	Task
1	Developed the backend services and APIs.
2	Design and manage the database.
3	Implement business logic and server-side functionalities.
4	Integrate backend with frontend and ML model.
5	Ensure security and performance optimization.

4. Jesvin Jose

Sl. No.	Task
1	Conduct research on backend technologies and best practices.
2	Support all team members throughout the project.
3	Assist in backend research and implementation.
4	Assist in testing, debugging and improvement of the system.
5	Help in documentation and report preparation.
6	Participate in project meetings and discussions.
